HUGAU GESTION: FOCUS 2025 IN CASH MANAGEMENT

While the ECB will continue to cut rates in 2025 as the 2% inflation target is gradually achieved, investors should be looking to secure a decent return, i.e. a positive real return.

At Hugau Gestion, we recommend the following approach:

- For cash management, our UCITS Hugau Moneterme FR0013267663 offers a meaningful opportunity. Its 2025 performance should be €STR +35 bps after +4.02% in 2024. Its portfolio is fully invested at the start of the year, with 50% fixed rates and 50% variable rates. Its current yield is 3.70% for a sensitivity of 0.35, which will ensure a 2025 performance higher than that of its benchmark, the capitalised €STR or the 3-month Euribor (2.76% as of 13/01/2025). The latter has begun to fall sharply on expectations of further ECB rate cuts in 2025. Hugau Gestion forecasts 4 cuts of 25 bps in the ECB deposit rate in 2025.
- For cash with longer visibility, Hugau Obli 1-3 FR0010613521 offers a real alternative. This fund is made up of short bonds with a duration of 2 years and a current yield of +4.40% at the beginning of January. As a result, it should be able to deliver an annual performance of 4% in 2025 (+5.58% in 2024 net of management fees). A daily net asset value makes it attractive for managing an investor's cash position with a six months duration.
- For investors looking to extend their portfolio maturity beyond a 3 year period of time corresponding to when the ECB is set to cut its key rate to below 2% at the end of December 2025, Hugau Obli 3-5 FR0010731513 offers an attractive prospect of around 4.50% expected performance in 2025 (perf. 2024 +6.07%) combined with day-to-day liquidity (daily NAV), compared with a German 3-year at 2.20% as of 13/01/2025.
- Ultimately, by agreeing to block its cash for one year (end of April 2025 - 31 March 2026), the Hugau 12M FR0011201896 mutual fund will offer a yield of 4%, well above that of a money market fund.

FOCUS ON HUGAU MONETERME

The FCP Hugau Moneterme FR0013267663 is our flagship fund.

Its portfolio is fully invested at the start of the year, with 50% fixed rates and 50% variable rates.

It is ideal for day-to-day liquidity management.

The current driver is the portfolio's current yield which is at **+3.70%** instantaneously at the end of December 2024.

Its 2025 performance should be €STR +35 bps; after +4.02% in 2024 and +3.56% in 2023.
