Dividends received 2025 : € 11 269,13

12-month volatility : 12,63%

Average PER : 19,91

Average Yield : 2,75%

RISK AND REWARD PROFILE (SRI)

Lower risk, typically lower
rewardHigher risk, typically higher
reward

Risks not taken into account in the indicator:

Credit risk: In the event of a deterioration in the quality of the issuers or if the issuer is no longer able to meet its maturities, the value of these securities may fall, thus causing the net asset value to fall.

Liquidity risk: In the particular case where the exchange volumes on the financial markets are very low, any purchase or sale transaction on the latter may cause significant variations in the market.

Counterparty risk: This risk is linked to the conclusion of contracts on financial futures and the conclusion of temporary acquisitions and sales of securities. It represents the risk of default by a market participant preventing it from honoring its commitments vis-à-vis the UCITS for example (payment, reimbursement, non-delivery). The occurrence of any of these risks may have a negative impact on the net asset value of the UCITS.

Risks related to the impact of techniques such as derivatives: The use of derivatives may lead to significant short-term fluctuations in the value of the derivatives and the net asset value in the event of opposing market trends.

No capital guarantee.
